**FABEL | HTML, Tailwind , React.js, Node.js , Express.js , MongoDB , Stripe**

[Github](#) | [Video](#)

It is a full-stack MERN (MongoDB, Express, React, Node.js) book storeapp featuring Firebase authentication, CRUD operations, and REST API integration. The project includes a React frontend with dynamic routing, a Node.js backend with MongoDB for data storage, and secure user login via Google/email. Built with optimized API calls, CORS configuration, and modular architecture for scalability. Demonstrates end-to-end web development with modern frameworks and cloud authentication.

**LEARNIVERSE| HTML , Tailwind , Javascript , React.js , Clerk**

[Github](#) | [Video](#)

It is a responsive course hub built with **React.js** and **Clerk Authentication**, offering a seamless way to explore diverse learning programs. Developed with **HTML, CSS, and JavaScript**, it delivers a smooth user experience with secure login and interactive browsing. The project highlights **frontend development skills** with a focus on clean design and real-world authentication integration.
